EDUCATION

University of Maryland, Baltimore County

Bachelor of Science in Computer Science

Catonsville, MD

Expected May 2025, GPA: 3.0 /4.0

EXPERIENCE

Contract Website Developer

The Hidden Parts Podcast

September 2024 – January 2025

Catonsville, MD

- Developed and maintained responsive websites using HTML, CSS, React, and node.js
- Enhanced user experience by implementing mobile-friendly designs and optimizing page load speeds
- Led client requirement gathering sessions, resulting in 100% on-time delivery and exceeding quality benchmarks

Software Engineer Intern

Sonavex Inc.

May 2024 - August 2024

Baltimore, MD

- Spearheaded the development of a custom technology stack after evaluation of various tools and frameworks, ensuring optimal performance and future scalability.
- Developed a user-friendly GUI with PyQt, improving tool usability for medical professionals.
- Developed and optimized a database of medical scans using SQLite, significantly improving data retrieval times and ensuring secure and reliable data storage.
- Transitioned a MATLAB-dependent application to a cost-effective, modern Python solution, saving over \$4,000 annually in licensing fees.

Summer Research Intern

US Devcom Army Research Lab

May 2023 - August 2023

Aberdeen Proving Ground, MD

- Successfully facilitated integration between Unity and Unreal Game Engine based robotic simulations through a SQL bridge.
- Proficiently designed and developed a Graphical User Interface (GUI) within RVIZ, streamlining visualization workflows for robotics simulations.
- Leveraged diverse technology stack (C#, Unity, Unreal, ROS 1/2, C++, Python, QT, RVIZ, SQL) to develop innovative features, enhance simulation fidelity and robotic testing capabilities

PROJECTS

Music Genre Classifier | Python, Pytorch, numpy, matplotlib, Kaggle, Librosa

January 2025

- Developed a Music Genre Classifier using Python and PyTorch.
- Implemented audio processing with librosa for feature extraction.
- Designed and trained a Convolutional Neural Network (CNN) for genre classification

Task Sync | JavaScript, Node.js, Express.js, React, MongoDB, WebSockets, Git

August 2024 – Present

- Developed a full-stack web application built with JavaScript. It serves a REST API using Express.js on the backend and uses React for the frontend.
- Designed and implemented a MongoDB database schema to manage user data, tasks, and group information, ensuring optimal data retrieval and scalability
- Implemented real-time updates for group collaboration using WebSocket technology, ensuring all users see live changes to tasks and schedules.
- Collaborated with a team of developers to follow agile methodologies, completing sprints and delivering features such as task assignment, group management, and real-time notifications.

First Person Game | Python, Pygame, numpy, numba

January 2024

- Developed a 2D game using Python and Pygame, featuring a main menu, game window, and options menu.
- Created a procedural map generation algorithm to dynamically create game levels
- Implemented a real-time rendering engine to display the game environment and handle user interactions

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, JavaScript, HTML/CSS,

Frameworks: React, Node.js, JUnit, Tailwind, Bootstrap, ROS 1/2, Express.js

Developer Tools: Git, Docker, Figma, Unity, Unreal Engine, RVIZ, MongoDB, VS Code

Libraries: Pandas, NumPy, Matplotlib, Librosa
